EPBC Species Sightings Register - Quarterly to July/27/2022

Species Sightings (including carcasses)	Location	Date & Time		GPS Coordinates / Grid		Notes
* Include whether carcass or not in notes column				Easting	Northing	
Tasmanian devil (<i>Sarcophilus harrisii</i>) (on-site camera images)**	Camera 9					turned the sensitivity down on all cameras as getting full SD cards of nothing but plants moving , needs to be tweaked as this quarter resulted in very few animal pics

Note: All cameras monitor for the presence of Tasmanian Devil Facial Tumour Disease in north-west Tasmania. Images are sent to an independent expert who assesses same and forwards the results to the Save The Tasmanian Devil Program. No diseased animals have been recorded to date. **Mine lease sighting and site camera GPS coordinates are not published due to site security and unauthorised access risk. Camera locations are changed on occasion. #Certain other location coordinates may not be published for species security reasons. Roadkill Note: No EPBC roadkill was caused by mine vehicles. Cameras last downloaded 27/07/2022. Next quarterly report october 2022
